# SUMIT PATHAK

Pune, India | sumitpathak2904@gmail.com | 8076221099 | linkedin.com/in/sumitpathak29

## PROFESSIONAL SUMMARY

Final-year B.Tech Computer Science student (Symbiosis Institute of Technology, Pune) with hands-on experience turning raw data into actionable business insight. Built an end-to-end marketing analytics pipeline (Python, SQL, Power BI) covering data cleaning, KPI development, and interactive dashboarding, alongside broader experience across full-stack development and applied ML/RAG systems. Comfortable with Excel, SQL, and Python for exploratory analysis, and skilled at communicating findings through clear visuals and dashboards. Looking to bring an analytical, detail-oriented approach to a Data/Analyst Intern role.

## TECHNICAL SKILLS

- **Data & Analytics:** Python (Pandas, NumPy), SQL, SQLite, Power BI, MS Excel, MS PowerPoint, Exploratory Data Analysis, KPI Design (CTR, ROAS, ROI, Conversion Rate)
- **Languages:** Python, C++, JavaScript, SQL, HTML, CSS
- **Frontend / Backend:** React.js, Node.js, Express.js, FastAPI, REST APIs, JWT Authentication
- **Databases:** PostgreSQL, MongoDB, SQLite, ChromaDB
- **AI / ML:** PyTorch, Scikit-learn, LLaMA 3.1/3.2, LoRA/QLoRA, RAG, Prompt Engineering, LangChain, Hugging Face
- **Cloud & Tools:** AWS EC2, Git/GitHub, Jupyter, Gradio

## PROJECTS

**Marketing Campaign Performance Analytics** *Python, SQL, SQLite, Power BI*

- Built an end-to-end marketing analytics pipeline using Python, Pandas and SQLite to ingest, clean and analyze campaign, audience, daily metrics and conversion datasets.
- Performed SQL-based data exploration, aggregation and multi-table joins to create an analytical campaign-level dataset containing impressions, clicks, conversions, spend and revenue metrics.
- Conducted exploratory data analysis in Python/Pandas to identify campaign, channel, device, country and audience-level performance patterns.
- Developed marketing KPIs including CTR, conversion rate, ROAS and ROI to evaluate campaign efficiency and revenue performance.
- Designed an interactive Power BI dashboard for campaign performance monitoring and business analysis, enabling comparison across campaigns, channels, devices and audience segments.

**Medical Research Assistant** *Python, LangChain, ChromaDB, Llama 3.2, Ollama, Gradio, Hugging Face*

- Built a multi-document Retrieval-Augmented Generation (RAG) system that processes medical PDFs, generates semantic embeddings, and stores document vectors in a persistent ChromaDB knowledge base.
- Implemented the RAG pipeline end-to-end — PDF extraction, chunking, embedding generation, semantic retrieval, and grounded LLM generation — with a Gradio interface supporting source/page attribution.

**Task Manager Web Application** *React.js, Node.js, Express.js, MongoDB, JWT*

- Built a full-stack task management app with JWT-based authentication/authorization, REST APIs for task CRUD, prioritization, deadlines, filtering and search.
- Built a responsive React.js frontend integrated with the Express/MongoDB backend, structured into modular routes, middleware, and controllers.

## CERTIFICATIONS

- Nutanix Hybrid Cloud Fundamentals (NHCF) — March 2026
- Full-Stack Web Development Bootcamp — Node.js, Express.js, React.js, Databases, REST APIs, Deployment
- AI Engineering — LLM, RAG, QLoRA, Agents

## EDUCATION

**Bachelor of Technology (B.Tech), Computer Science** 2023 – 2027

Symbiosis Institute of Technology, Pune
